

Invitation to Visit/Tour of the Midnight Sun Camera Obscura Project Exhibition

Dear photo club members,

This summer, the McMaster Museum of Art in Hamilton presents a photo-based exhibition by a group of artists and researchers that we thought would be of interest to you and your members. I invite you to come see the show at McMaster, informally or for a guided tour. Admission is free.

THE EXHIBITION

[The Midnight Sun Camera Obscura Project](#)

Organized by the University of Lethbridge Art Gallery

Principal Investigator and Artist/Researcher: Donald Lawrence

Curator: Josephine Mills

Artists: Dianne Bos, Lea Bucknell, Ernie Kroeger, Kevin Schmidt, Holly Ward, Carsten Wirth, and Andrew Wright

On view at the McMaster Museum of Art from May 10 – August 18, 2018

During summer solstice 2015 in Dawson City, Yukon, *the Midnight Sun Camera Obscura Festival* brought together an international group of artists and other researchers interested in cameras obscura and related optical phenomenon as a meeting place of art and science, cultural and wilderness settings, learning and play. Curated from the results of the festival, this exhibition includes one of the actual cameras obscura; images projected by several of the devices; documentation of the event; and new work produced in response to the research – pinhole artist Dianne Bos's *Star Shed*.

TOURS

For a free guided tour of the exhibition, please contact me, Teresa Gregorio at gregort@mcmaster.ca to book.

I hope to see you soon.

Best,

Teresa Gregorio
